

LG 4K Surgical Monitor

27HJ710S

Superior Image Quality for Delicate Surgery

8MP* IPS Display with sRGB 115%(Deep Red)

The 8MP IPS display offers detailed images of previously hard-to-see regions and displays multiple imaging applications. It provides more accurate color reproduction with sRGB 115%(Deep Red), especially in the deep red color spectrum for color expression.

*8MP(Mega Pixel): 4K, 3840x2160

DICOM* Part 14 & Brightness Stabilization

The LG surgical monitor carefully measures and sets every grayscale tone as well to create a monitor compliant with DICOM Part 14 and ensure the most accurate outcome. And, its stabilized brightness settings quickly adapt to the surgical procedure and local lighting conditions.

*DICOM: Digital Imaging and Communications in Medicine.

Essential Features for Safe Operation

IP35 & IP32 : Dustproof & Water Resistance

To ensure protection against contact with substances such as blood or bodily fluids, LG surgical monitors are cleanable and durable, with ratings of IP35 on the front and IP32 on the back, securing them from any direction.

Anti-Reflection & Optical Bonding Glass

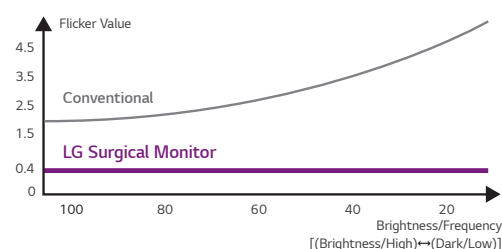

The LG surgical monitor with optical bonding glass significantly reduces internal reflection between the outer glass and the LCD to enhance accuracy. The improved anti-reflection ability enables a brighter and sharper display for the highest image quality.

Long-lasting Eye Comfort

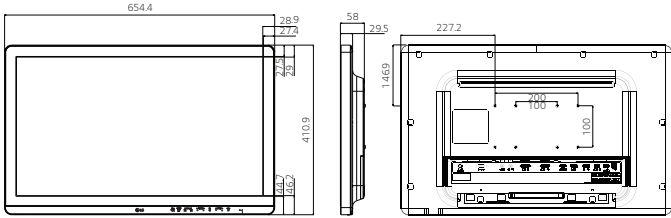

Flicker Safe

Flicker Safe reduces the onscreen flicker level to almost zero, which helps minimize eye strain and eye fatigue. By combining Flicker Safe with the proven picture quality of IPS technology, users can comfortably work throughout the day.
